

Human Resource management app

Vision

Human Resource management app is a web-application, which allows storing of data about departments and employees.

The web application should allow:

1. display a list of departments and the average salary (calculated automatically) for these departments
2. display a list of employees in the departments with an indication of the salary for each employee and a search field to search for employees born on a certain date or in the period between dates
3. change (add / edit / delete) the above data
